

Palina Markovich

UI/UX Designer

Summary

I'm a Wrocław, Poland-based result-oriented UI/UX designer focused on delivering measurable impact for products and businesses. I transform complex workflows into intuitive, user-centered interfaces that enhance efficiency and satisfaction. I base my design decisions on data and user experience analytics, combining aesthetics, functionality, and strategic thinking. My work helps teams make faster decisions, minimize user errors, and increase conversion rates.

Professional experience

UI/UX Designer – Part-time | Hotburo

March 2025 – Present

- Contributed to multiple projects simultaneously, taking independent ownership of some while collaborating within a team on others — enabling the studio to deliver faster across parallel workstreams. Communicated directly with clients in English, Russian, and Ukrainian, removing communication bottlenecks and speeding up feedback cycles. Extended an existing design system with new components to support complex functionality, ensuring consistency and accelerating the introduction of new features. Delivered promotional landing pages, mobile applications, and multi-page corporate websites.

UI/UX designer – Freelance

September 2024 – Present

- Medical Website, Mobile CRM & Sales Materials:** Led the full design of an intuitive, user-friendly website for a private medical center in Polish to improve user experience and increase conversion rates. Additionally, adapted cryptocurrency wallet websites for mobile devices, optimizing tables, dashboards, and CRM systems for clear data visualization and intuitive user interaction; and designed sales presentations to support sales teams in client presentations.
- Artist Portfolio Website:** Collaborated with a frontend developer to design and build a portfolio website for an artist, crafting a visual language that highlights the artist's style without competing with the work itself.
- Multi-Platform Design Projects:** Collaborated with an art director on an ongoing basis across projects spanning mobile applications, landing pages, and multi-page corporate websites, including a site for a

design studio. Consistently delivered within external deadlines by streamlining the design process — using plugins, templates, and AI tools to accelerate layout and decorative work, keeping focus on quality output under time pressure.

UI/UX designer – Internships

October 2025 - February 2026

- **Game Server Management Platform:** Designed new screens with better clarity and efficiency across desktop and mobile, refining interface components and their states, and creating dashboard layouts and user flows to support faster feature releases while maintaining full consistency with the existing design system. [Certificate](#) ↗
- **Maximilian Courses:** I collaborated under mentorship to design a roll-up banners and onboarding screens for mobile applications. Combined graphic design tools with UI/UX principles to ensure visual clarity and brand consistency.

Education

UX/UI website and app designer course with Alice K

Comprehensive program covering UX research, wireframing, prototyping, and UI design. Developed practical skills through real-world projects including mobile app and website design. Gained proficiency in design systems, user testing methodologies, and industry-standard tools like Figma. [Certificate](#) ↗

Software

Figma

Adobe Illustrator

Adobe Photoshop

Skills

• User research

• Responsive design

• Information architecture

• Layout & composition

• Pixel-perfect design

• Task flows / Flowcharts

• Visual consistency

• Wireframing

• Design systems

• UI for dashboards

• A/B testing

• Accessibility

- Usability testing

- Prototyping

- CJM

Languages

 – English (B2)

 – Polish (C1)

 – Belarusian (C2)

 – Russian (C2)
